

14

third content area · the biggest one

Distribution & Dissemination, STARR-ed

K5 · K12 · K13 · K14 · S10 · S11 · S12 · S13 · D2 / D3

The biggest content area by KSB count, but conceptually the simplest: *how do you communicate the work?* **The Audience Switch** covers most of the KSBs in one move.

The Audience Switch — in three columns

Same analysis, three audiences. The analysis doesn't change; the delivery does.

Below: one piece of data (the StreamWave churn rate) communicated three ways

— technical peer, manager, end user.

SAME ANALYSIS • THREE AUDIENCES

churn rate by region — communicated three ways

TECHNICAL PEER	MANAGER	END USER
<i>a fellow data person</i>	<i>your stakeholder</i>	<i>non-technical / customer</i>
FORMAT Methodology doc + screenshots of Applied Steps, formula breakdown.	FORMAT Dashboard + headline + 2-minute verbal walkthrough.	FORMAT Single number on a screen, accessible visual, one sentence.
LANGUAGE Precise. XL00KUP, fan-out, key mismatch. Method names allowed.	LANGUAGE Plain. "Roughly a third of subscribers cancel within..."	LANGUAGE Everyday. No jargon. No % unless the audience is comfortable.
DEPTH Full method, full reasoning, caveats, alternative approaches.	DEPTH Headline first. Caveat second. Method only if asked.	DEPTH The headline. Nothing else. Method invisible.
SAMPLE LINE "31.2% churn from a Group By on status — verified with a Two-Route Check against the cancellations table. n=280."	SAMPLE LINE "Churn is sitting at around 31% — that's about 87 of our 280 subscribers. London and the South East are higher than average."	SAMPLE LINE "Fewer people in your area are renewing their subscription."
THE KSB BLOCK K5 • S10 • S11 • S13 <i>tech documentation focus</i>	THE KSB BLOCK K12 • K14 • S10 • S13 <i>narrative + audience focus</i>	THE KSB BLOCK K14 • S10 • S13 <i>accessibility focus</i>

What sits inside Distribution & Dissemination

Eight KSBS. Don't try to learn each one in isolation — group them by what they ask for.

Group	KSBS	What the discussion will probe
Communicate	K5 · K12 · S10 · S13	Methods (written, verbal, visual), narrative, adapting to audience.
Document	S11	Technical documentation using organisational templates.
Audience awareness	K14	Customer issues, business value, accessibility, technical level.
Store & secure	S12	Storage, distribution, security — in line with standards.
Legal & ethical	K13	UK GDPR, IPR, data sharing, marketing consent, ethics.

SHOW THIS OFF

The Audience Switch covers Communicate + Audience awareness in a single answer (K5, K12, K14, S10, S13). One story, five KSBS. Practise it once and you've evidence-rich the biggest part of the chapter.

D2 and D3 in plain English

Two of the three Distinction descriptors sit in this content area. Both have the same shape underneath: *evaluate the choice, justify it, name what would have gone wrong otherwise.*

D2

"Critically evaluate why data is communicated and why different communication methods are used."

The two moves:

1. Justify *why* you communicated this particular finding at all.
2. Justify *why* you chose this delivery method for this audience.

D3

"Evaluate storage, management and distribution needs and justify ethical and security standards."

The two moves:

1. Justify the storage / access decision (who sees what).
2. Name the legal / ethical reason it was the right call.

The Audience Switch covers D2; the GDPR-aware version covers D3

When you walk through the Audience Switch in the discussion, add one D3 layer: *"the version for the end user had names redacted – this is personal viewing data, UK GDPR; the version for the manager kept names because the business reason was set up under our access agreement."* That single sentence ticks D3.

ASSESSOR FAVOURITE

Naming *UK GDPR*, *data minimisation*, or *least-privilege access* – even once – lifts D3 toward Distinction. These aren't jargon; they're the named principles the standard expects you to recognise.

S11 — technical documentation

S11 is "Mandatory evidence: Present" — the assessor needs to hear about specific documents you've written using organisational templates. Not what documentation is for. Specific docs.

Three types that almost always count

- **Methodology notes** — the paragraph at the bottom of a dashboard explaining sources, transforms, assumptions, refresh date. (You wrote one in Phase 1 Day 7.)
- **Data dictionaries** — the table that names each field, its meaning, its allowed values, its source.
- **Standard operating procedures** — the step-by-step doc for recurring tasks (e.g., monthly reconciliation).

What "organisational templates" means in practice

Most workplaces have a template you're expected to use — a header block with version, author, approval, status. The assessor wants to hear that you used the workplace template, not that you invented your own.

Question shape to expect: *"Give me an example of a piece of technical documentation you produced."*

The answer shape: name the document by type and title · name when it was used and by whom · mention the template / version-control approach · brief Reflection on what it taught you about writing for handover.

K13 — the legal & ethical layer

K13 is wide. The discussion-relevant chunks are smaller. Three areas the assessor will probe — with the answer-shape for each.

- 1

UK GDPR + Data Protection Act 2018

Personal data, data minimisation, lawful basis, retention. *The answer shape:* name one workplace example where you considered GDPR — redacting names in a shared sheet, aggregating instead of listing, deleting an unused export.
- 2

Intellectual Property Rights (IPR)

Who owns the dashboards / queries / scripts you build at work? (Usually your employer, under your contract.) Who owns the data? (Depends on the source — you've probably used internal data, customer data, external data with different ownership.) *The answer shape:* one sentence acknowledging the ownership and one example of how it shaped a decision.
- 3

Data sharing + marketing consent

Sharing data with third parties (cloud providers, external analysts, partners) requires documented agreements. Marketing consent must be specific and opt-in. *The answer shape:* one workplace example — even if the example is "we considered sharing X with Y and decided not to because..."

RED FLAG · DON'T BLUFF GDPR

If you're not certain of a detail, say so. "My understanding is that lawful basis matters, but I'd want to check the specifics with our data protection lead." Honest beats wrong. Bluffing on GDPR specifics is a recurring failure mode.

SHARPEN YOUR PENCIL 40 minutes – the Audience Switch on your anchor

Take your Distribution & Dissemination anchor. Sketch how you'd deliver the *same* finding to three different audiences. Note the format, language, depth, sample line for each.

The finding I'm communicating: *name it here:*

Audience	Format / channel	Language register	My sample line
Technical peer			-----
Manager / stakeholder			-----
End user / public			-----

Halfway House

Five quick questions.

1. Distribution & Dissemination contains 8 KSBs – the biggest content area.

☐ **True** ☐ **False**

2. The Audience Switch is one piece of analysis described for three different audiences.

☐ **True** ☐ **False**

3. D2 specifically wants me to evaluate *why* I chose a communication method.

☐ **True** ☐ **False**

4. When I'm not sure of a GDPR detail, my best move is to give my best guess confidently.

☐ **True** ☐ **False**

5. S11 (technical documentation) requires me to name specific documents I produced.

☐ **True** ☐ **False**

Answers

1. **True.** 4 K, 4 S, plus 2 of the 3 Distinction descriptors. Plan accordingly.
2. **True.** Same analysis, three audiences. One story covers 5+ KSBs.
3. **True.** D2 is about justifying the method choice.
4. **False.** Bluff warning still applies. *"I'd want to check"* beats wrong.
5. **True.** Specific docs (methodology notes, data dictionaries, SOPs) with template / version-control context.

There are no *Dumb* Questions

- Q:** *I've only ever communicated my work to one audience — my manager. Can I still do the Audience Switch?*
- A:** Yes — describe how you *would* communicate it differently to a peer or end user. The Audience Switch is about audience awareness, not about whether you've actually done all three. *"To a technical peer I'd have included the methodology; to an end user I'd have skipped the percentage and just said 'fewer people'."*
- Q:** *My organisation doesn't use formal documentation templates. How do I answer S11?*
- A:** You probably do have de-facto templates — e.g., the layout of dashboards, the format of methodology paragraphs, the structure of email summaries. Name those. *"Our team has a standard methodology paragraph that lives at the bottom of every dashboard — sources, transforms, assumptions, last refresh."*
- Q:** *How much GDPR detail do I need to know?*
- A:** Enough to name three things in your own work that show data-protection thinking: redacting names, aggregating data, limiting access. You're not being assessed as a DPO; you're being assessed as a data tech who knows the rules apply.
- Q:** *I've sometimes used personal data without thinking about it — I just use what's in the source system. Is that a problem?*
- A:** For the discussion, no — provided you can describe how you'd think about it now. Reflection moves like *"on reflection, I'd want to check the lawful basis for that report"* demonstrate exactly what D3 rewards: evaluation, not perfection.
- Q:** *S12 is about "storage and security" — we just save things in our shared drive. What do I say?*
- A:** That's storage and security — explain the controls on the shared drive. *"Our shared drive is restricted to the team; the methodology folder requires manager approval to access."* Storage / security doesn't mean cloud architecture — it means controlled access.
-

Say it for real

Q1 — Tell me about a time you had to communicate a finding to a different audience than the people you usually work with.

The shape: full STARR. The Audience Switch lives in Action: *"For my manager I summarised at the headline level; for the customer-facing team I cut the percentages and replaced them with plain language."* Reflection closes with D2: *"the reason for splitting it that way was that..."*

Q2 — Walk me through how you handle the security and storage of the data you work with.

The shape: two short stories. One about access (who can see the file). One about retention (when it gets deleted or aggregated). Land on a D3 sentence: *"the reason for restricting access at that level was the lawful basis for the original collection — the data was gathered under a clinical agreement, not a marketing one."*

SHOW THIS OFF

Naming *"data minimisation"*, *"least-privilege access"*, or *"lawful basis"* — once — tells the assessor you know the principles, not just the practices. One of those phrases is worth a paragraph of vague description.

Bullet Points — the chapter in 30 seconds

- **Eight KSBs.** K5, K12, K13, K14, S10, S11, S12, S13. The biggest content area.
- **The Audience Switch is the workhorse device.** Same analysis, three audiences. Covers 5+ KSBs in one story.
- **D2 wants justification of method choice.** D3 wants justification of storage + ethics.
- **S11 is mandatory-evidence.** Name specific documents you produced, with template context.
- **Name the legal principles.** UK GDPR, data minimisation, lawful basis, least-privilege — once each is enough.
- **Don't bluff GDPR.** "I'd want to check" beats wrong every time.

TEST DRIVE

Tick each only when it's true:

☐ You can deliver your anchor's finding three ways — technical peer, manager, end user — from memory.

☐ You can name two specific pieces of technical documentation you produced.

☐ You've practised a D2 sentence: *"the reason I chose this method for this audience was..."*

☐ You've practised a D3 sentence naming at least one legal principle.

☐ You can describe your workplace's storage / access controls in one sentence.

COMING UP — DAY 15

Approach to Work, STARR-ed. The final content area — the soft-skill KSBs (K16, S14, S15, S17, B1, B5, B6). Named device: **The Behaviour Story** — a shape for evidencing the things that don't have an Excel formula. Pulls Phase 1's Day 8 (Effective Working Practices) forward.

that's Day 14 done — the biggest content area, rehearsed.
